Spatola Pro
Technical Specifications

A range of professional trowels with a soft-grip handle and steel blade for high-precision application. Ergonomic SoftGrip handle for greater comfort and control. The handle support is secured to the blade with 6 welded rivets, ensuring high durability. High-quality 0.6 mm elastic steel blade with teeth of various sizes to suit any type of application.

Product description

The range of professional trowels is designed to offer precision, comfort and reliability at every stage of the application process.
Each trowel is fitted with an ergonomic SoftGrip handle, made from soft-touch materials, which ensures excellent manoeuvrability even during prolonged use.
The handle is securely fixed to the blade by six welded rivets, a construction solution that guarantees strength, durability and a long service life.
The blade, made from high-quality spring steel with a thickness of 0.6 mm, is designed to adapt perfectly to all surfaces, whilst offering flexibility and precision when applying materials.

The range includes various configurations designed to meet all laying requirements.
Spatulas with 2 mm V-shaped teeth are available, ideal for high-precision applications, as well as variants with square teeth measuring 3.5 mm, 4 mm, 6 mm, 8 mm, 10 mm and 12 mm, suitable for compensating for different thicknesses
For more specific requirements, a version with 20 x 10 mm round teeth is also available, which allows for even distribution on more complex surfaces.
For specific applications requiring non-conventional application of the adhesive, the Tiger Trowel is available, featuring irregular teeth.

Technical Specifications

Article	Box
2 mm V	6 pcs
3.5 mm square-toothed trowel	6 pcs
4 mm square teeth	6 pcs
6 mm square teeth	6 pcs
8 mm square teeth	6 pcs
10 mm square teeth	6 pcs
12 mm square teeth	6 pcs
20 x 10 mm Round teeth	6 pcs
Tiger Trowel Irregular teeth	10 pcs
